ASC-10 Hydrophilic softener

ASC-10 is a highly efficient soften agent, suitable for natural fibers, regenerated fibers and their blends. It improves water absorbency and fiber strength, also imparts excellent soft soften smooth handle.

General properties:

Appearance	:	Light yellow emulsion liquid
Composition	:	Fatty acid quaternary compound
Ionic nature	:	Cationic
pH (1%)	:	4+ / -1.0
Solubility	:	Easy to dissolve in cold water

Special features:

1. Suitable for cotton, viscose rayon, wool and synthetic fibers.
2. When applied on natural fibers, it improves the fiber strength and resiliency.
3. No yellowing bleaching fiber.
4. Imparts peculiar soften smoothing handle.
5. When applied on synthetic fibers, it improves water absorbency.

Application:

Dosages would be dependent on processes and fabrics conditions.

Normal dosage :

ASC-10	:	1 - 2 %
Pick up	:	45 – 55 %

Note : Full evaluation is recommended prior to commercial usage.
