## KM-SPD Raising agent

**KM-SPD** is a raising agent of special components and is suitable for polyester fabrics. it imparts peculiar smooth and full handle to the raised fabrics.

### General properties:

Appearance	: White emulsion liquid
Composition	: Poly fatty acid ester compound
Ionic nature	: Nonionic
pH(1%)	: 4 + / - 1.0
Solubility	: Completely soluble in water

### Special features:

1. Imparts peculiar full, soft and smooth handle.
2. Makes raising easier but gets excellent raised quality.
3. Most suitable for the raising of polyester fabrics.

Application:

Dosages depend on finishing and fabrics constructions.

Could be applied by both padding and exhaustion methods:

A. By exhaustion:

KM-SPD	:	3 - 6 % (owf)
Temperature	:	below 40°C
Time	:	15 - 20 min

B. By padding:

KM-SPD	:	3 - 6 % (ows)
Pick up	:	70 - 80 %

Note: full evaluation is recommended prior to commercial usage.
