SIL-TN Silicone Lubricating agent

SIL-TN is a silicone lubricating agent especially designed for application on synthetics and natural fibers. It imparts a soft and smooth handle with excellent elasticity effects.

General properties:

Appearance	:	Transparent liquid
Composition	:	Silicone compound
Ionic nature	:	N/W-C
pH (1% solution)	:	7.0 +/- 1.0
Solubility	:	Easy to dissolve in cold water

Special features:

1. Can be used alone or with resin finishing.
2. Imparts a pleasing soft, smooth handle with excellent elasticity properties.
3. Improves tear and abrasion strength.
4. Non-yellowing.
5. Suitable for application on all fibers.

SIL-TN
Softener

1 ~ 3%(o.w.s.)
2.0 ~ 3.0%(o.w.s.)

Note: full evaluation is recommended prior to commercial usage.
